ABOUT ME

I am a detail-oriented Web Designer with hands-on experience in HTML, CSS, JavaScript, Bootstrap, and Figma. I enjoy solving design problems and creating clean, structured layouts. I am looking for an opportunity where I can apply my skills, learn new technologies, and contribute to impactful projects.

PROJECTS

• SCOOP DELIGHT

HTML, CSS, JAVASCRIPT, BOOTSTRAP

I designed and developed a colorful, responsive ice-cream brand website using HTML, CSS, Bootstrap, and JavaScript. The project features a modern hero section, product listings, category filters, event highlights, and a newsletter form. I focused on clean layout, engaging visuals, smooth interactions, and mobile-friendly design, creating an attractive and user-friendly interface that reflects the brand's fun and vibrant identity.

• SWIFTSOLE

HTML, CSS, JAVASCRIPT, BOOTSTRAP

I designed and developed a modern, responsive e-commerce hero section for a premium sneaker brand using HTML, CSS, Bootstrap, and JavaScript. The project focused on creating a clean layout with strong visual hierarchy, including promotional text, product previews, sale badges, and clear call-to-action buttons. I implemented responsive design techniques to ensure the section adapts smoothly across mobile, tablet, and desktop screens. Additionally, I added subtle animations and interactive hover effects to enhance user engagement, while optimizing the overall structure and visuals to deliver a professional, storefront-like user experience.

• JET CYCLE

HTML, CSS, BOOTSTRAP

I designed and developed a fully responsive bicycle eCommerce website featuring a modern hero section, product listings, customer reviews, and an integrated contact form. The layout was created using HTML, CSS, and Bootstrap for a clean user experience. The project focuses on organized product grids, interactive buttons, and a visually appealing design that highlights usability, accessibility, and mobile-friendly performance showcasing my front-end development and UI/UX design skills.
